

OV7695 VGA product brief

Ultra-Compact, Cost-Effective Secondary Camera Solution for Smartphones and Tablets

available in
a lead-free
package

The OV7695 is a high-performance CameraChip™ sensor that utilizes OmniVision's new OmniBSI+™ pixel architecture to deliver high quality VGA video at 30 frames per second. At just 2.4 x 2.3 mm, the cost-competitive OV7695 is a highly attractive solution for front-facing cameras in smartphones and tablets.

The 1/13-inch VGA sensor is built on a 1.75-micron OmniBSI+ pixel, which has a significantly lower level of noise when compared with traditional FSI pixel architectures. The result is a dramatic improvement in dynamic range, which translates into higher quality color video. Using proprietary technology to improve image quality, the OV7695 reduces or eliminates common

sources of image contamination such as fixed pattern noise and smearing to produce a clean, stable color image.

The sensor provides full-framed, sub-sampled and cropped images in YUV422 format via a one-lane MIPI interface. All required image processing functions, including exposure control, gamma, white balance, color saturation, defective pixel canceling, and noise canceling are programmable through the serial camera control bus (SCCB) interface.

Applications

- Cellular and Picture Phones
- PC Multimedia
- Tablets
- Toys
- Digital Video Cameras

Product Features

- support for image sizes:
 - VGA (640x480)
 - QVGA (320x240)
 - QQVGA (160x120)
 - HF (640x20)
- support for output formats: YUV4:2:2 through MIPI
- on-chip phase lock loop (PLL)
- built-in 1.5V regulator for digital block
- capable of maintaining register values at software power down
- programmable controls for frame rate, mirror and flip, AEC/AGC, and windowing
- support for horizontal and vertical sub-sampling
- automatic image control functions:
 - automatic exposure control (AEC)
 - automatic white balance (AWB)
 - automatic black level calibration (ABLC)
- image quality controls: defect pixel correction and lens shading correction
- support for black sun cancellation
- standard serial SCCB interface
- parallel I/O tri-state configurability and programmable polarity

OV7695

Ordering Information

- OV07695-A17A**
(color, lead-free, 17-pin CSP3)

Product Specifications

- active array size:** 656 x 496
- power supply:**
 - core: 1.5V DC $\pm 5\%$ (internal regulator)
 - analog: 2.8V $\pm 5\%$
 - I/O: 2.8V, 1.8V
- temperature range:**
 - operating: -30°C to 70°C junction temperature
 - stable image: 0°C to 50°C junction temperature
- output formats:** YUV422
- lens size:** 1/13"
- lens chief ray angle:** 26°
- input clock frequency:** 6 - 27 MHz
- max S/N ratio:** 35.9 dB
- dynamic range:** 69.2 dB @ 16x gain
- maximum image transfer rate:**
 - VGA (640x480): 30 fps
 - QVGA (320x240): 60 fps
 - QQVGA (160x120): 120 fps
 - HF (640x20): 120 fps
- sensitivity:** 1000 mV/lux-sec
- scan mode:** progressive
- maximum exposure interval:** $536 \times t_{\text{row}}$
- pixel size:** $1.75 \mu\text{m} \times 1.75 \mu\text{m}$
- image area:** $1148 \mu\text{m} \times 868 \mu\text{m}$
- package dimensions:**
 - CSP3: $2370 \mu\text{m} \times 2300 \mu\text{m}$
