High-Resolution, Cost-Effective Global Shutter Image Sensors for Machine Vision Applications

OmniVision’s OG02B1B (monochrome) and OG02B10 (color) are global shutter image sensors designed to cost-effectively enable a wide range of consumer and industrial machine vision applications such as AR/VR headsets and accessories, industrial automation, robotics, agricultural drones and 3D modeling. These sensors provide designers with best-in-class resolution and the option for full-color imaging, and both have a 15 degree chief ray angle (CRA) to support wide field-of-view lens designs. This combination of color imaging and CRA is excellent for applications such as agricultural drones that must capture high-resolution color images for crop and field monitoring.

Available in a 1/2.9 inch optical format, the OG02B1B and OG02B10 capture 2 megapixel or 1600 x 1300 resolution images and video at 60 frames per second (fps) using advanced 3 x 3 micron OmniPixel®3-GS pixel technology. This global shutter technology eliminates motion artifacts and blurring, and dramatically improves low-light sensitivity. Additionally, both sensors’ excellent near infrared (NIR) sensitivity at 850 nm and 940 nm helps reduce device power consumption to extend battery life.

Applications
- Augmented and Virtual Reality
- Drones
- 3D Imaging
- Machine Vision
- Industrial Bar Code Scanning
- Industrial Automation

Product Features
- 3 µm x 3 µm pixel with OmniPixel®3-GS technology
- automatic black level calibration (ABLC)
- programmable controls for:
  - frame rate
  - mirror and flip
  - cropping
  - windowing
- support output formats: 8/10-bit RAW
- DVP parallel output interface
- 2-lane MIPI serial output interface
- supports 2x2 monochrome binning
- fast mode switching
- supports 2x2 monochrome binning
- two-lane MIPI serial output interface
- programmable controls for:
  - automatic black level calibration (ABLC)
  - with OmniPixel®3-GS technology
- 3 µm x 3 µm pixel
- programmable (OTP) memory
- embedded 128 bytes of one-time programmable (OTP) memory
- supports horizontal and vertical 2:1 monochrome subsampling
- support for image sizes:
  - 640 x 480
  - 1280 x 720
  - 1600 x 1300
- supports windowing
- supports cropping
- supports mirror and flip
- supports frame rate
- supports 640 x 480
- supports 1280 x 720
- supports 1600 x 1300
- supports horizontal and vertical 2:1 monochrome subsampling
- supports windowing
- supports cropping
- supports mirror and flip
- supports frame rate

Product Specifications
- active array size: 1600 x 1300
- power supply:
  - analog: 2.8V (nominal)
  - core: 1.2V (nominal)
  - I/0: 1.8V (nominal)
- temperature range:
  - operating: -30°C to +85°C junction temperature
  - storage: -40°C to +85°C
  - temperature range: 1.8V (nominal)
- I/O:
  - core: 1.2V (nominal)
  - analog: 2.8V (nominal)
- power supply:
  - active array:
  - I/O:
  - core:
  - analog:
  - temperature sensor:
  - LED PWM:
  - built-in strobe control
- two on-chip phase lock loops (PLLs)
- programmable controls for:
  - automatic black level calibration (ABLC)
  - with OmniPixel®3-GS technology
- 3 µm x 3 µm pixel
- programmable (OTP) memory
- embedded 128 bytes of one-time programmable (OTP) memory
- supports horizontal and vertical 2:1 monochrome subsampling
- support for image sizes:
  - 640 x 480
  - 1280 x 720
  - 1600 x 1300
- supports windowing
- supports cropping
- supports mirror and flip
- supports frame rate
- supports 640 x 480
- supports 1280 x 720
- supports 1600 x 1300
- supports horizontal and vertical 2:1 monochrome subsampling
- supports windowing
- supports cropping
- supports mirror and flip
- supports frame rate
