About OmniVision

OmniVision Technologies designs, develops and markets high performance, highly integrated and cost efficient semiconductor image sensor devices. Our main product, an image sensing device called the CameraChip, is used to capture an image in a wide variety of consumer commercial mass market applications including digital still cameras, cell phones and video game consoles. OmniVision believes that its highly integrated CameraChips enable camera device manufacturers to build camera products that are smaller, consume less power, cost less and are less complex and more reliable than cameras using either traditional CCDs or multiple chip CMOS image sensors. OmniVision believes that it supplies one of the most highly integrated single chip CMOS image sensor solutions available today. OmniVision's CameraChips are currently used in a number of consumer and commercial applications such as digital

still and video cameras, cell phones, personal digital assistants, personal computer cameras, toys and games, including interactive video games, and security surveillance cameras.

OmniVision and CameraChip are trademarks of OmniVision Technologies, Inc.
