

OMNIVISION TECHNOLOGIES ANNOUNCES

TWO-FOR-ONE STOCK SPLIT

SUNNYVALE, Calif. — January 20, 2004 — The Board of Directors of OmniVision Technologies, Inc. ([Nasdaq: OVTI](#)) has approved a 2-for-1 split of the Company's common stock to be effected in the form of a stock dividend payable to shareholders of record on January 30, 2004.

Shareholders of record on January 30, 2004 will receive one additional share of common stock for every share held on the record date. It is anticipated that the additional shares will be distributed on February 17, 2004.

About OmniVision

OmniVision Technologies designs, develops and markets high performance, highly integrated and cost efficient semiconductor image sensor devices. Our main product, an image sensing device called the CameraChip™, is used to capture an image in a wide variety of consumer and commercial mass-market applications including digital still cameras, cell phones and video game consoles. OmniVision believes that its highly integrated CameraChips enable device manufacturers to build camera products that are smaller, less complex and more reliable, cost less, and consume less power than cameras using either traditional CCDs or multiple-chip CMOS image sensors. OmniVision believes that it supplies one of the most highly integrated single-chip CMOS image sensor solutions available today. OmniVision's CameraChips are currently used in a number of consumer and commercial applications such as digital still and video cameras, cell phones, personal digital assistants, personal computer cameras, toys and games, including interactive video games, and security surveillance cameras.

OmniVision and CameraChip are trademarks of OmniVision Technologies, Inc.
